Excel Assignment 2 – Data Exploration

1. Handling Missing Values

- Check for missing values in the 'Price' column. How would you handle products with missing price information?

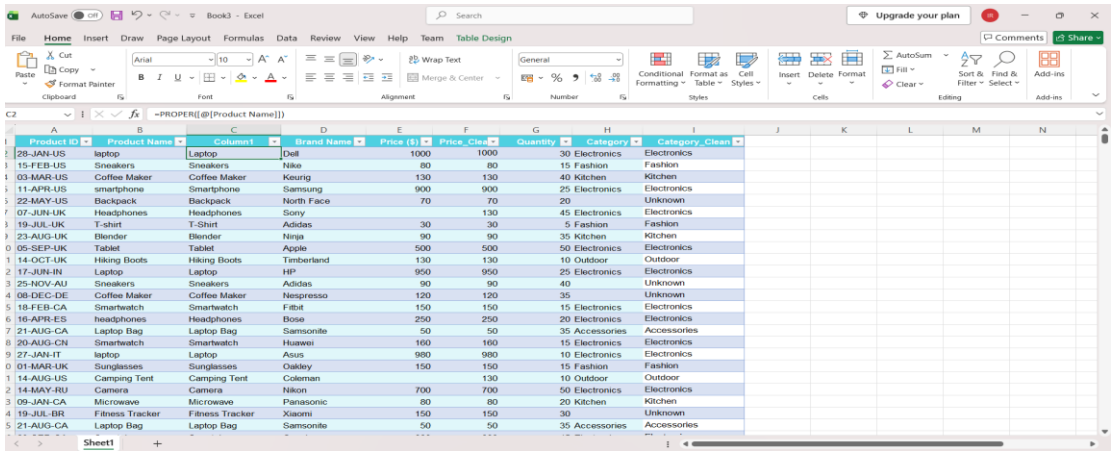

- If there are products with missing categories, propose a strategy to impute or deal with these missing values effectively.

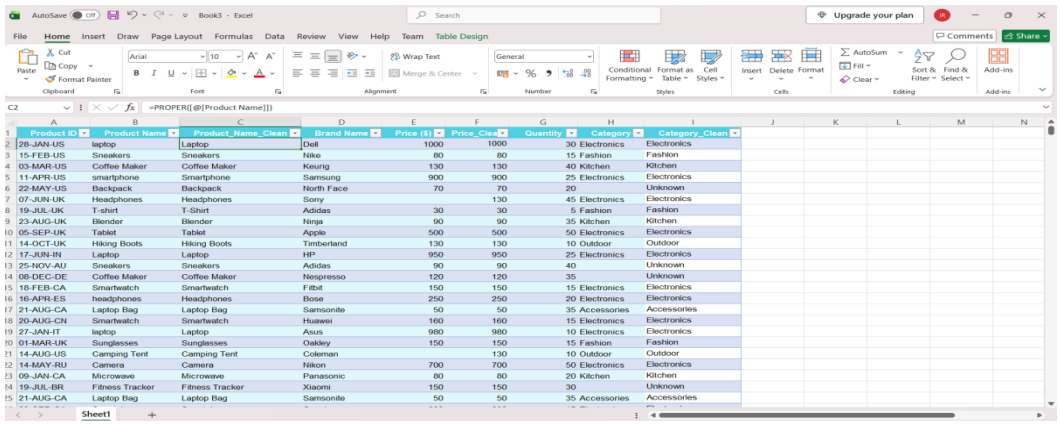

2. Correcting Inconsistent Data

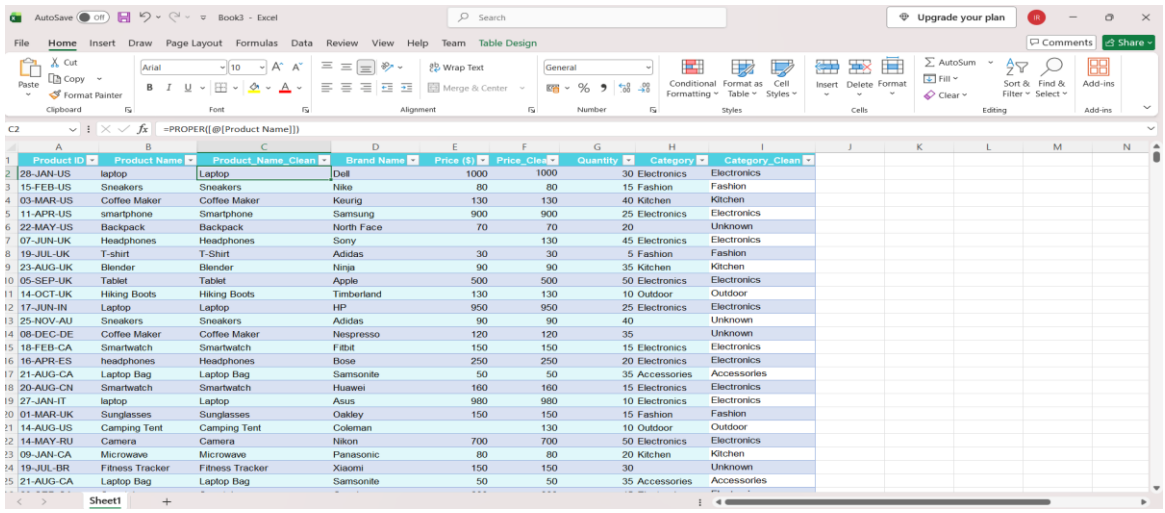

- Identify any inconsistent text formats present in the "Product Name" column.

- Identify any typos present in the "Category" column.

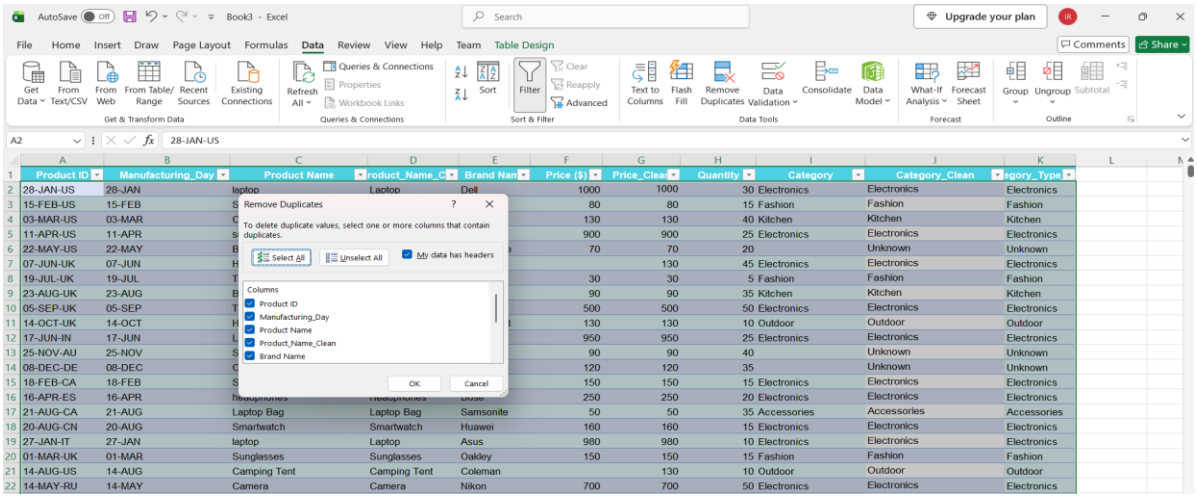

- Use the find and replace function to standardize the text formats in the "Product Name" column and fix any typos or misspellings in the "Category" column.

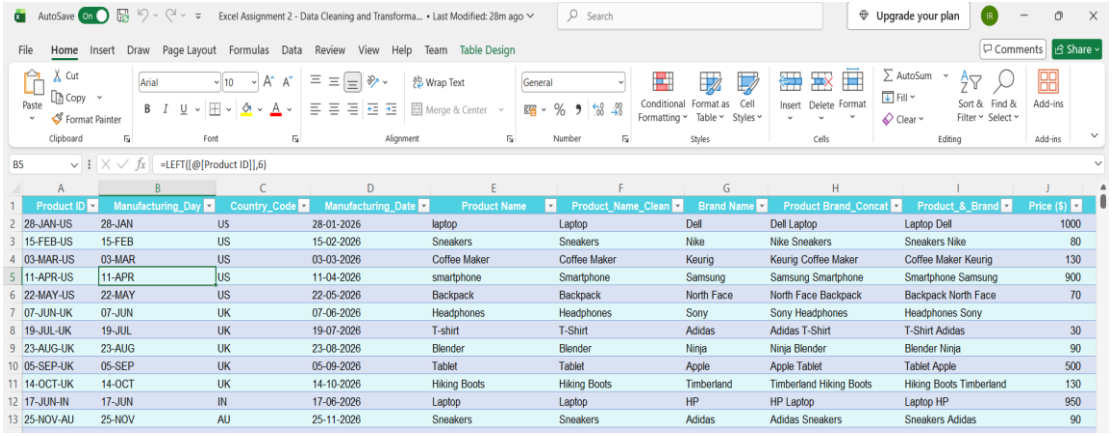

3. Removing Duplicates

- Identify any duplicate rows within the dataset based on the entirety of each row, and remove them if any.

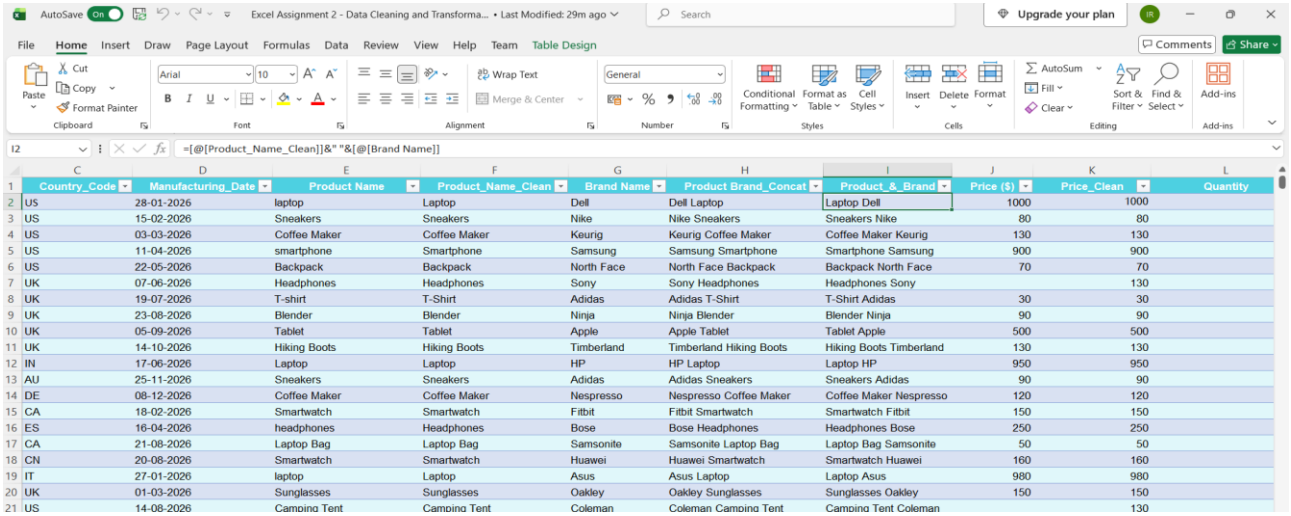

4. Splitting and Merging Data

- Split the "Product ID" column into two separate columns for " Manufacturing Date" and "Country Code". Remove unnecessary characters, if any.

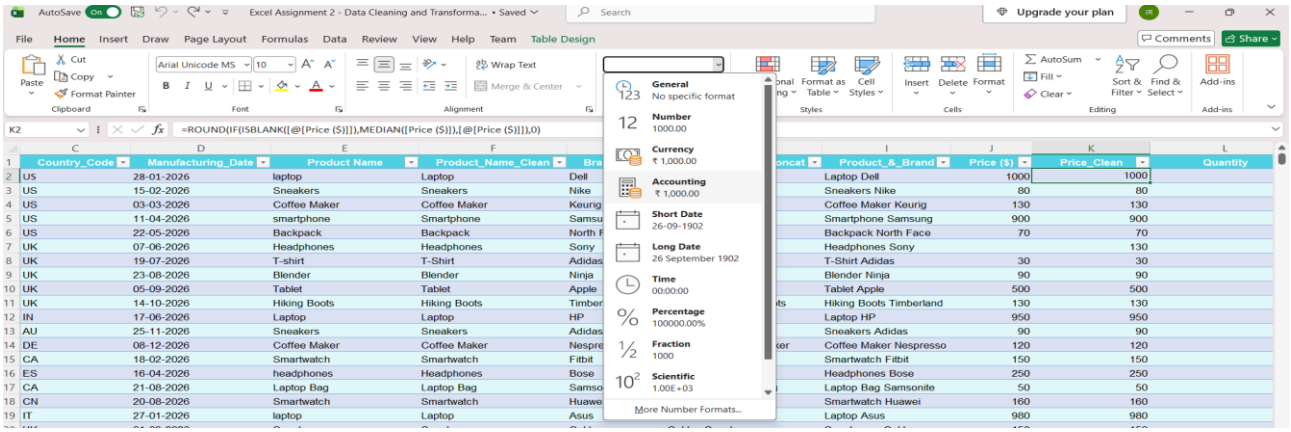

- Merge the "Brand Name" and "Product Name" columns into one column named "Product Brand".

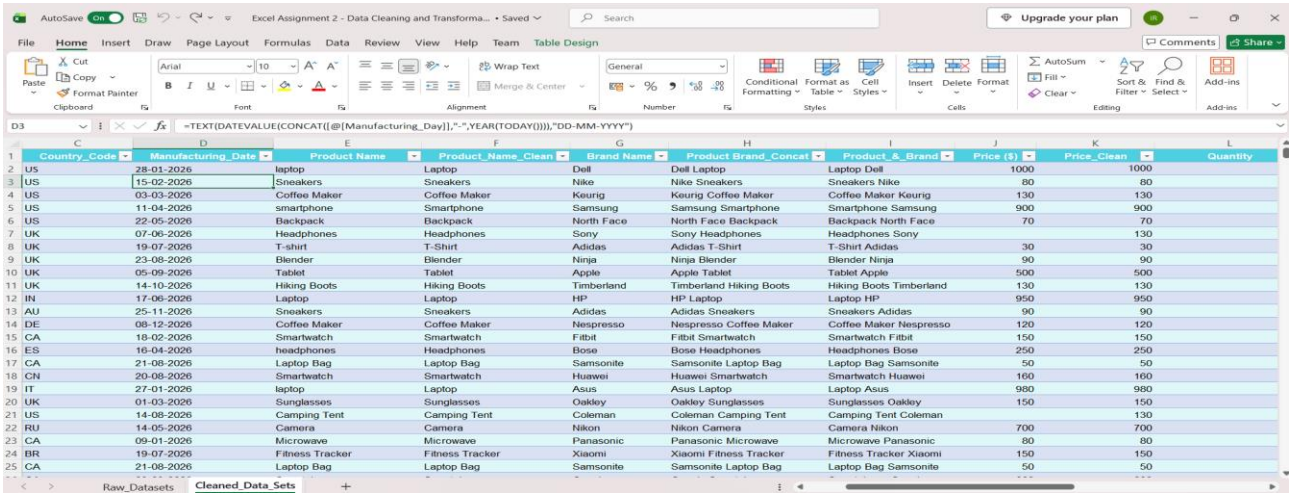

5. Number Formatting

- Format the data type of the "Price" column to a currency format.

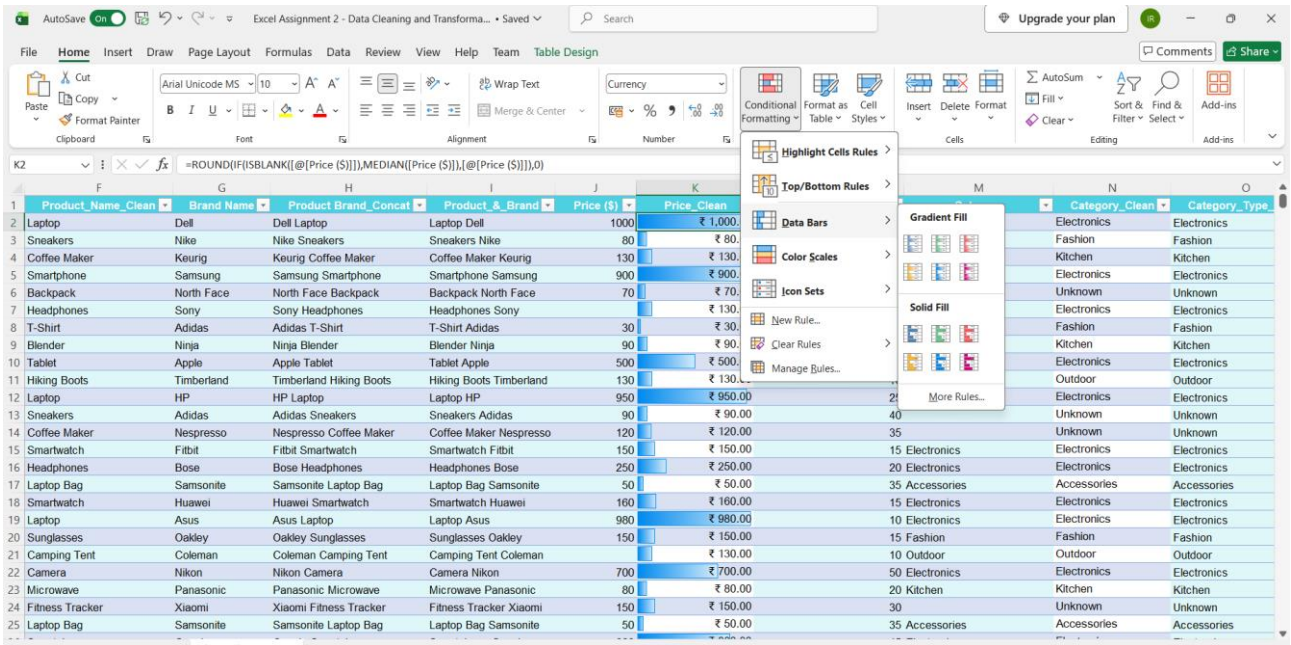

- Format the "Manufacturing Date" column to display dates in the "DD-MM-YYYY " format.

6. Conditional Formatting

- Apply data bar or color scales conditional formatting in the "Price" column.

- Create a custom rule for conditional formatting in the "Category" column to highlight cells where the category is "Electronics."
